

I Claim:

1. A game comprising:
 - multiple base structures, each of said base structures having one or more substantially planar playing surface thereon; and
 - multiple non-uniformly shaped playing pieces suitable for stacking on said playing surfaces in an unrestricted manner in accordance with rules for playing the game.
- 10 2. The game of claim 1, further including a game board, for attachment of said base structures thereon.
- 15 3. The game of claim 2, wherein said base structures are removably securable to said game board.
4. The game of claim 3, wherein said base structure are attached to a game insert, said game insert being removably securable to said game board.
- 20 5. The game of claim 2, wherein said game board includes legs for supporting said game board in an upright, substantially horizontal game playing position.
- 25 6. The game of claim 5, wherein said legs are removably securable to said game board.
7. The game of claim 2, wherein said game board includes an upper surface for attachment of said base structures thereon and a storage compartment located below said upper surface.
- 30 8. The game of claim 6, wherein said game board includes an upper surface for attachment of said base structures thereto and a storage compartment located below said upper surface, said storage compartment suitable for storing said playing pieces, said base structures and said legs.

9. The game of claim 1, wherein selected ones of said playing surfaces are non-horizontal.
10. The game of claim 1, wherein said playing surfaces are non-uniform in shape and surface area.
 - 5
11. The game of claim 1, wherein said playing pieces vary in size according to a predetermined number of preselected sizes.
 - 10
12. The game of claim 11, wherein said playing pieces are coloured and wherein said playing pieces having the same said preselected size are the same colour and wherein said differently sized playing pieces are differently coloured.
 - 15
13. The game of claim 11, wherein the number of said base structures is equal to said predetermined number of said preselected sizes of said playing pieces.
 - 20
14. The game of claim 12, wherein the number of said base structures is equal to said predetermined number of said preselected sizes of said playing pieces, each of said base structures having a preselected colour, and each said preselected colour of said base structures corresponding to the colour of a selected one of said playing pieces.
 - 25
15. A game comprising:
 - a game board;
 - multiple base structures removably securable to said game board, each of said base structures having one or more substantially planar playing surface thereon, selected ones of said playing surfaces being non-horizontal, said playing surfaces being non-uniform in shape and surface area; and
 - 30
 - multiple non-uniformly shaped playing pieces suitable for stacking on said playing surfaces in an unrestricted manner in accordance with rules for playing the game, said playing pieces varying in size according to a predetermined number of preselected sizes.
 - 35

16. A method of game play comprising:
assembling multiple base structures on a surface, each
of said base structures having one or more substantially
planar playing surface thereon;
- 5 providing multiple non-uniformly shaped playing pieces
suitable for stacking on said playing surfaces in an
unrestricted manner;
- selecting one of said playing pieces and one of said
base structures; and
- 10 placing said selected playing piece on one of said
playing surfaces on said selected base structure.
17. The method of claim 16, wherein selected ones of said
playing surfaces are non-horizontal.
- 15
18. The method of claim 16, wherein said playing surfaces are
non-uniform in shape and surface area.
19. The method of claim 16, wherein said playing pieces vary in
size according to a predetermined number of preselected
20 sizes.
20. The method of claim 19, wherein said playing pieces are
coloured and wherein said playing pieces having the same
25 said preselected size are the same colour and wherein said
differently sized playing pieces are differently coloured.
21. The method of claim 19, wherein the number of said base
structures is equal to said predetermined number of said
30 preselected sizes of said playing pieces.
22. The method of claim 20, wherein the number of said base
structures is equal to said predetermined number of said
preselected sizes of said playing pieces, each of said base
35 structures having a preselected colour, and each said
preselected colour of said base structures corresponding to
the colour of a selected one of said playing pieces.
